**Thin Stamped Overlays:**  
Achieved with TEXTURE-PAVE™ applied at 1/4" to 3/8" thick to existing concrete substrates and imprinted with THIN-PRINT™ texture skins to achieve the look of authentic stone, slate, brick or tile. Unlike conventional stamped concrete there is no need to remove and replace the existing concrete therefore eliminating the hassle, mess and clean-up normally associated with stamped concrete. Thin stamped overlays are more affordable, require less application time and easier to install than conventional stamped concrete, real stone, slate, brick or tile.

**Splatter Textures & Knockdowns:**  
Achieved by applying THIN-FINISH™ with a hopper-type sprayer at 1/16" to 1/8" thick to an existing concrete substrates. Splatter textures can be applied in countless color and pattern combinations to match surrounding landscape and architecture.

**Seamless Custom Flooring:**  
Although many variation of flooring can be achieved with a wide array of our products, one of the more desired finishes uses MICRO-FINISH™ to create a "glass smooth" finish on existing concrete substrates which can then be stained with CHEM-STONE™ to add an elegant, variegated, translucent color.

**Skim Coat Resurfacing & Broom Finishes:**  
Designed as a surface restoration finish, this application uses THIN-FINISH™ typically installed 1/32" to 1/8" thick over an existing concrete substrate. Applied with a specialty squeegee, trowel and broom to restore and refinish spalled & deteriorated concrete surfaces which would otherwise need to be removed and replaced.

Due to the fact that the conditions of use and application of our products are beyond our control, Elite Crete Systems, Inc. makes no warranty of merchantability or fitness for any particular purpose and expressly disclaims liability for consequential or incidental damages whether based on warranty or negligence. Buyer's sole remedy shall be refund of the raw material purchase price from point of purchase.
