

## The Most Complete Concrete Overlay Product Line . . .

Elite Crete Systems manufactures the most complete line of products for architectural concrete overlays and cementitious flooring systems. From thin stamped overlays that mimic the authentic look of stone, brick and slate to splatter texture finishes that create an elegant but useful non-slip finish to broom finish resurfacing designed to recreate a new surface on deteriorated concrete to seamless custom floor finishes where the only design limitation is your imagination.

We offer you the quality and experience of millions of square feet of installed finishes from the company that originated the hybrid-polymer concrete overlay system. With a selection of endless patterns, textures, colors and design options, Elite Crete Systems gives you the versatility and creativity to meet your ideas and exceed your expectations.

*Elite Crete Systems, the leader in the architectural concrete overlay and custom flooring industry has trained contractors throughout the United States as well as Internationally to provide you quality workmanship and professional installations of the various finishes our products create.*

The experience we have collected over the years gives us a keen insight about the demands it takes for our customers to succeed. An experienced, highly qualified technical and sales staff is always ready to support customers.

**Installers:** We and our distributors assist contractors extensively on our product features, application techniques and business issues in general. Training, on-going support and even on-site assistance is part of the day to day operations of our distributors.

**Distributors:** We provide technical data and product information as well as continued marketing support to ensure our distributors education and business development. With successful distributors located across the globe, we have the experience to provide exceptional support while expediting orders to our distributors facilities.

**Specifiers:** We provide detailed product information and technical data for specifications. We also assist with specification writing, proprietary specifications, product calculations, job site references and more.

Our customer service and technical support includes detailed, hands-on training seminars, job-site visits, 24 hour a day telephone assistance and a detailed informational website, [www.elitecrete.com](http://www.elitecrete.com), where you can learn more about our products, installation procedures, and find key contact information about our authorized distribution network.
